Volume 76—Contents

NO. 1. JANUARY 1996

1 Synaptic Vesicle Biogenesis, Docking, and Fusion: A Molecular Description
Nicole Calakos and Richard H. Scheller

31 Molecular Mechanisms of Iron Uptake in Eukaryotes
Deepika M. De Silva, Candice C. Askwith, and Jerry Kaplan

49 Molecular Physiology of Cardiac Potassium Channels
Karen K. Deal, Sarah K. England, and Michael M. Tamkun

69 Cellular Changes Involved in Conversion of Normal to Malignant Breast: Importance of the Stromal Reaction
Lone Rønnov-Jessen, Ole W. Petersen, and Mina J. Bissell

127 Defining the Roles of Parathyroid Hormone-Related Protein in Normal Physiology
W. M. Philbrick, J. J. Wysolmerski, S. Galbraith, E. Holt, J. J. Orloff, K. H. Yang, R. C. Vasavada, E. C. Weir, A. E. Broadus, and A. F. Stewart

175 Molecular and Cellular Biology of Thyrotropin-Releasing Hormone Receptors
Marvin C. Gershengorn and Roman Osman

193 Modulation of Cardiovascular Control Mechanisms and Their Interaction
Pontus Börje Persson

245 Protein Trafficking and Polarity in Kidney Epithelium: From Cell Biology to Physiology
Dennis Brown and Jennifer L. Stow

NO. 2. APRIL 1996

299 Physiology and Biochemistry of *Drosophila* Learning Mutants
Ronald L. Davis

319 Degeneration and Regeneration of Axons in the Lesioned Spinal Cord
Martin E. Schwab and Deborah Bartholdi

371 Molecular Diversity of Myofibrillar Proteins: Gene Regulation and Functional Significance
Stefano Schiaffino and Carlo Reggiani

425 Paracrine Regulation of the Renal Microcirculation
L. G. Navar, E. W. Inscho, D. S. A. Majid, J. D. Imig, L. M. Harrison-Bernard, and K. D. Mitchell

537 Malignant Hyperthermia: Excitation-Contraction Coupling, Ca^{2+} Release Channel, and Cell Ca^{2+} Regulation Defects
James R. Mickelson and Charles F. Louis

593 Transcriptional Control of Osteoblast Growth and Differentiation
Gary S. Stein, Jane B. Lian, Janet L. Stein, André J. Van Wijnen, and Martin Montecino

NO. 3. JULY 1996

631 Cellular Functions of Immunophilins
Andrew R. Marks

651 Regulation of Protein Transport to the Nucleus: Central Role of Phosphorylation
David A. Jans and Stefan Hübner

687 Principles of Rhythmic Motor Pattern Generation
Eve Marder and Ronald L. Calabrese

719 Taste Reception
Bernd Lindemann

767 Gastric Endocrine Cells: Gene Expression, Processing, and Targeting of Active Products
Graham J. Dockray, Andrea Varro, and Rod Dimaline

799 Nuclear Magnetic Resonance Spectroscopy of Living Systems: Applications in Comparative Physiology
Guido Van Den Thillart and Aren Van Waarde

839 Oxygen Sensing and Molecular Adaptation to Hypoxia
H. Franklin Bunn and Robert O. Poyton

887 Structure and Function of Voltage-Dependent Sodium Channels: Comparison of Brain II and Cardiac Isoforms
Harry A. Fozzard and Dorothy A. Hanck

NO. 4. OCTOBER 1996

927 Cytokine Regulation of the Macrophage (Mϕ) System Studied Using the Colony Stimulating Factor-1-Deficient *op/op* Mouse
Wieslaw Wiktor-Jedrzejczak and Siamon Gordon

949 Endocytosis, Intracellular Transport, and Cytotoxic Action of Shiga Toxin and Ricin
Kirsten Sandvig and Bo van Deurs

967 Mechanisms of Smooth Muscle Contraction
Arie Horowitz, Constance B. Menice, Regent Laporte, and Kathleen G. Morgan

1005 Growth, Differentiation, and Survival: Multiple Physiological Functions for Insulin-Like Growth Factors
Claire E. H. Stewart and Peter Rotwein

1027 Ryanodine Receptor Ca^{2+} Release Channels: Does Diversity in Form Equal Diversity in Function?
John L. Sutko and Judith A. Airey

1073 Structure and Functional Mechanism of Porins
Bing K. Jap and Peter J. Walian

1089 Mechanism of Signaling by Growth Hormone Receptor
Lawrence S. Argetsinger and Christin Carter-Su

1109 Regulation of Gene Expression by Insulin
Richard M. O'Brien and Daryl K. Granner

1163 Index
